

American Freedom Party

NATION . ORDER . FREEDOM

The **American Freedom Party** stands on a nationalist platform that is guided by the core principle that the United States was founded for and by European-Americans. We reject both the Democratic and Republican parties with the acknowledgment that both actively work against the American People, and instead, we fight for the rebirth of our dying Nation. We understand that we must battle for our own representation, and the **American Freedom Party** accepts this solemn responsibility in the struggle for our national interest.

The most important characteristic of a nation is its people, and we recognize our people's very existence is under dire threat. The preservation of our heritage is vital to our posterity, and only by awakening our national identity will we be granted the opportunity to change course in the present. Organized as a vanguard party focusing on survival and prosperity for the American Nation, the **AFP** embodies the determination and discipline necessary to secure our national future.

Our mission is clear and essential. We have taken on this endeavor with the understanding that our eventual victory is vital for the success of the American People.
